PROFESSIONAL SUMMARY

Product Designer with 2 years of experience designing end-to-end digital products across fintech, payments, and enterprise platforms. Proven track record leading full product design cycles — from discovery and wireframing to high-fidelity UI and developer handoff — within cross-functional agile teams. Deep expertise in transaction monitoring dashboards, merchant-facing portals, and mobile-first financial tools. Skilled in translating complex payment workflows into intuitive, accessible, and scalable user experiences.

WORK EXPERIENCE

Product Designer | Trustlypay — Hyderabad

Mar 2025 – Jul 2026

- Led end-to-end redesign of internal and merchant-facing payment dashboards as part of a full tech stack migration (PHP/Java → Node.js + React.js), improving task completion rates and reducing operational support requests.
- Designed and shipped a mobile-only transaction monitoring dashboard using FlutterFlow, from concept to stakeholder-approved delivery — the product received strong approval in internal review and is now in active use.
- Partnered with engineering and product leads to define requirements, align on UX trade-offs, and ensure design fidelity through handoff — acting as a bridge between design intent and technical implementation.
- Built responsive UI/UX systems supporting high-volume transaction workflows, focusing on clarity, error prevention, and operator efficiency in a regulated payments environment.
- Contributed as acting design lead by ensuring all design decisions aligned with product architecture, platform scalability, and long-term system design goals.

UI/UX Designer | Xyenta — Hyderabad

Mar 2023 – Sep 2023

- Owned full design lifecycle for digital product development — from initial research and wireframes through to final UI — taking sole responsibility for all design decisions on a small product team.
- Collaborated directly with developers and business stakeholders to integrate design into the product roadmap, contributing to feature scoping and product architecture discussions.
- Led hiring for the design function: defined role criteria, screened candidates, conducted design task reviews, and successfully hired two UI/UX designers to scale the team.

Associate – Recruiting Services | Amazon — Hyderabad

Jun 2021 – Dec 2022

- Managed EMEA-wide recruitment operations including scheduling assessments, coordinating with hiring managers, and resolving candidate queries for roles including Field Engineer (FEE), Software Development Engineer (SDE), Systems Development Engineer, Maintenance Technician, and IT Support Associate — spanning both technical and infrastructure operations profiles.
- Developed an Excel VBA macro to fully automate assessment invite emails — populating candidate-specific details and triggering templated emails with attachments — achieving a 70–80% reduction in manual processing time and significantly scaling team throughput.
- Operated ATS and recruitment platforms including HireVue, Amazon Hire, and iCIMS for sourcing, candidate tracking, scheduling, and reporting.
- Produced daily, weekly, and monthly recruitment metrics reports, enabling data-driven decision-making for the talent acquisition team.
- Awarded the Dazzler Award in recognition of outstanding contributions to recruitment process improvement.

Process Associate | [Genpact — Hyderabad](#) *Feb 2021 — Jun 2021*

- Resolved customer queries related to bookings, payments, and contract information, consistently meeting ticket closure targets.
- Generated performance reports and collaborated with cross-functional teams to enhance service delivery quality.

Graphic Designer & Video Editor | [EditPoint India — Hyderabad](#)

Oct 2020 — Feb 2021

- Produced brand identity assets, social media content, and high-quality video productions for clients — managing multiple concurrent projects while meeting strict deadlines.

CORE SKILLS & TOOLS

Product Design	End-to-end UX, User Flows, Wireframing, Prototyping, Usability Testing, Design Systems
Fintech Domain	Transaction Monitoring, Merchant Dashboards, Payment Workflows, Mobile Banking UI
Tools	Figma, FlutterFlow, Adobe XD, Photoshop, Illustrator, After Effects, Premiere Pro
Front-End	HTML, CSS, React.js (working knowledge), FlutterFlow
Automation	AI Tooling, Prompt Engineering, Excel VBA, Process Improvement
AI Tools	Lovable, Replit, Bolt, Emergent, GPT Codex, Claude Code
Collaboration	Agile/Scrum, Cross-functional Teams, Stakeholder Management, Developer Handoff

EDUCATION

MSc Human Resources Management University of Essex — Colchester, UK	<i>2023 — 2024</i>
Bachelor of Multimedia (VFX) IACG Multimedia — Hyderabad	<i>2016 — 2020</i>

CERTIFICATIONS

UI/UX Design from Scratch — Designerrs Lab	<i>Dec 2022</i>
Prompt Engineering for Everyone — Cognitive Class	<i>Feb 2026</i>
AI Tools & ChatGPT Workshop — Be10x	<i>Oct 2025</i>
